Today it is important for the Ural State University of Economics to integrate into the economic life of the region.

The University is ready to use its scientific and educational potential to support major state, regional and municipal projects. Training specialists at USUE is tailored to the perspective needs of the economy of the region. Meeting the key needs of business, USUE, is developing and implementing unique educational programs. A number of departments were opened in USUE: the Department of Antimonopoly Regulation of Competition in collaboration with the Office of Federal Antimonopoly Service in Sverdlovsk Region, the Department of Merchandise Expertise in collaboration with the Ural Customs Administration and others.

USUE aims to be at the forefront of higher education in the Urals Region. USUE competitive advantage is quality training of specialists in economics, finance, regional and municipal economy and management, food technologies, commodity merchandising, service and tourism. USUE is one of the leading universities of economics in Russia.

Educational work is given special emphasis. USUE leisure facilities and a modern sports and fitness centre help to realize students' creative and athletic potential.

The education received at USUE will help you build excellent professional career and achieve academic and business goals.

Yakov Silin

Acting Rector of the USUE, Doctor of Economics

UNIVERSITY

Legal Clinic

The Institute of Public Administration, Municipal Governance and Law provides higher education training in various fields of jurisprudence, forensic examination, human resource management, and public and municipal administration.

One of the most important areas of social and professional activity is the work of the USUE Legal Clinic, a structural subdivision whose purpose is to develop the professional competencies of law students under the guidance of experienced legal practitioners through the provision of legal advice to citizens on current legal issues.

The Institute also implements the «School of Law» project for senior school students, where participants may gain insight into the specifics of professional activity through master classes, professional quests, business games, and other interactive formats.

The departments of the Institute actively cooperate with partners and employers both within the Ural Federal District and in other regions of Russia, ensuring a high level of practice-oriented training for future specialists. The Institute's leading partners include the Federal Antimonopoly Service of Russia, the Ministry of Justice of Russia, the Federal Treasury of Russia, UMMC OJSC, JSC «Uralelectromed», JSC «Research and Production Corporation Uralvagonzavod», PJSC «M. I. Kalinin Machine-Building Plant», and others.

Department of Quality Management
and Expertise of Goods and Services

Department of Tourism Business
and Hospitality

Department of Logistics and Commerce

Department of Management
and Entrepreneurship

Department of Marketing
and International Management

Department of Foreign Languages

Department of Physics and Chemistry

At the Institute of Management, Entrepreneurship and Engineering, the educational process is aimed at training specialists with higher economic and technological education who acquire competencies in various fields of trade, food technology, service industries, management and marketing, as well as strategic and project management for Russian and international companies.

The Institute conducts research activities in the field of development and assessment of indicators of food quality and safety, enterprise quality management systems, examination of goods and food products, and the design of logistics systems. The scientific journal «Food Industry» is published by the Institute and is devoted to current issues and development prospects of the food industry.

The Institute includes the «Unified Laboratory Complex», equipped with modern educational and research equipment, as well as the «School of Service and Hospitality», which contributes to the positioning and promotion of the University in the fields of scientific and engineering technologies, hospitality, and culinary arts.

The Institute's departments implement career guidance projects for prospective students, including the Engineering School «World of Food Technologies», the Young Biotechnologist School, the School of Logistics and Commerce, the School of Management, and the School of Tourism and Hospitality.

The Institute develops partnerships with specialized enterprises of the city, which act as its industrial partners, including LLC «TourExpoService», LLC «USTA Hotels Management Company», LLC «Healthy Food Factory», LLC «Reputation Plus», PJSC «Pneumostroy mashina», Federal Budgetary Institution «URALTEST», and JSC «Irbis Dairy Plant».

Institute of Digital Management Technologies and Information Security

Department of Business Informatics

Department of Information
Technologies and Statistics

Department of Information Security

Department of Chess Art
and Computer Mathematics

Department of Creative Management
and Humanities

Department of Physical Education
and Sports

The Institute of Digital Management Technologies and Information Security trains specialists in IT-related fields, taking into account the key trends of the labour market, the digitalization of the economy, and the development of artificial intelligence.

The Institute trains highly qualified specialists in the development and operation of information systems, business informatics, information security, programming, and artificial intelligence. Graduates of the Institute work in major Russian and international companies such as SKB Kontur, 1C, and Sima-Land, in leading Russian banks including Sberbank, VTB, Bank Sinara, and the Central Bank of Russia, as well as in the Directorate of the Federal Service for Technical and Export Control, the Ministry of Digital Development and Communications of the Sverdlovsk Region, the information technology departments of state and municipal authorities, and the information security services of industrial enterprises.

The development of technical and software competencies is carried out on the basis of eight specialized laboratories, while their practical implementation and testing take place at the Cyber Range established with the technical support of the Ural Bank for Reconstruction and Development.

Students of the Institute demonstrate high achievements in e-sports, winning prizes in sports programming, phygital sports, and competitions in the disciplines «Real-Time Strategy» and «Tactical Combat».

The Institute's key partners in student training and research activities are among the largest Russian employers, including PJSC «Rostelecom», 1C Company, State Budgetary Institution of the Sverdlovsk Region «Electronic Government Operator», JSC «SKB Kontur», Sber Technohub, PJSC «UBRR», and others.

Master's degree programme

Master's degree programmes at USUE are the choice of those who deliberately build their careers and are result-oriented. Education is closely linked with the real economy: work with case studies, participation in company projects, and interaction with employers become part of the educational process from the very beginning.

The University develops a system of partnerships with leading enterprises of the Urals and Russia. These include JSC «Uralelectromed», JSC «SUMZ», JSC «Svyatogor», JSC «SHAAZ», JSC «UPZ», LLC «UGMK-Telecom», as well as companies from the fields of IT, medicine, logistics, construction, and consulting. This provides students with opportunities to undertake internships and work on real business tasks.

Master's degree programmes cover key areas of the modern economy, including marketing and branding, digital business analytics, international business, human resource management, economic security, logistics, business psychology, and others. Some programmes are delivered in English. Flexible formats make it possible to combine study with professional activity.

The international educational environment brings together students from different countries, developing intercultural communication skills and expanding professional opportunities. Studying in an international environment together with students from more than thirty countries makes this experience truly global.

Training of highly qualified personnel

Training of scientific and scientific-pedagogical personnel is one of the strategic directions of development of the Ural State University of Economics. For more than 55 years, USUE has accumulated a wealth of experience in scientific supervision of graduate students, doctoral students and applicants for academic degrees, scientific schools have been formed in various fields of science (economics, finance, food technology, analytical chemistry, etc.).

Field of Study: Management

Master's Programme: International Business

The Master's degree programme in Management, profile "International Business," is a prestigious academic pathway for ambitious students seeking to build a successful career in the global business environment. Delivered entirely in English, the programme combines strong academic foundations, practical relevance, and a profound understanding of the international economic, political, and cultural processes shaping today's global market. **The duration of study is 2 years.**

The programme is designed for future leaders, strategists, and managers who are ready to work confidently at the intersection of countries, industries, and business cultures. It is distinguished by its interdisciplinary approach, integrating management, marketing, international economics, and foreign economic activity. This allows graduates to become highly востребованными in multinational corporations, consulting, the financial sector, public institutions, and entrepreneurial ventures with an international focus.

During their studies, students develop a wide range of competencies essential for success in the modern global economy. The curriculum includes international management, global marketing, corporate finance, investment planning, strategic analysis of foreign markets, and foreign economic activity management. Particular emphasis is placed on developing analytical thinking, strategic vision, cross-cultural communication skills, and the ability to make effective managerial decisions in conditions of high uncertainty and a rapidly changing international environment.

Upon graduation, students are awarded a state-recognized Master's degree in Management with a specialization in International Business. This degree opens up broad career opportunities in Russian and international organizations and also provides a solid foundation for further academic development, including doctoral studies. For those who choose high-quality education, international professional experience, and competitive advantages in the global labor market, the "International Business" programme becomes not merely a stage of study, but a confident entry into a world of great opportunities, leadership, and professional success.

One of the programme's key advantages is its close connection with real business practice. Strategic partners include leading Russian and international companies and organizations such as Leroy Merlin, Metro Cash & Carry, Coca-Cola HBC Eurasia, UMMC-Holding, SKB Kontur, the Ministry of International and Foreign Economic Relations of the Sverdlovsk Region, and the Ural Chamber of Commerce and Industry.

Field of Study: Management

Master's Programme: International Tourism Management

The Master's programme in International Tourism Management is designed for ambitious students who want to build a successful career in one of the most dynamic and globally connected industries in the world. Delivered entirely in English, the programme offers a modern, practice-oriented education that combines management expertise with a deep understanding of international tourism, hospitality, and service.

Students gain essential knowledge in strategic tourism management, international marketing, digital communications, project management, customer experience, and service quality. The programme also explores the development of tourist destinations in a highly competitive global environment, helping students understand how to create, promote, and manage tourism products for diverse international markets.

Special attention is given to cross-cultural communication, innovative business models, and contemporary industry trends. This enables graduates to think strategically, act confidently in multicultural settings, and respond effectively to the challenges of the global tourism sector.

Graduates of the programme are well prepared for careers in travel companies, airlines, international hotel chains, event agencies, consulting firms, tourism authorities, and hospitality businesses. The programme also provides a strong foundation for those who plan to launch their own entrepreneurial projects in tourism and related industries.

Studying in English opens the door to academic mobility, international networking, and broader career opportunities worldwide. International Tourism Management is more than a degree – it is a gateway to a global profession, leadership opportunities, and a future in an industry that connects people, cultures, and economies.

Postgraduate Opportunity in Yekaterinburg, Russia

Master in international tourism and hospitality management

(English Medium, duration of training: 2 years)

Benefits for International Students (Sri Lanka)

Annual tuition fee concession – a reduced fee of 2200\$ 1700\$ is available for enrolled Sri Lankan students who are recommended by the Russian Language Centre at the University of Sri Jayewardenepura.

Complimentary accommodation is provided, including essential facilities such as cooking areas, Wi-Fi internet access, and appropriate sanitary amenities.

A free basic course in the Russian language is offered to facilitate cultural and academic integration.

Part-time employment opportunities (up to 20 hours per week) are arranged in star-class hotels in Yekaterinburg. Given the practical orientation of the programme, such roles significantly enhance students' industry exposure. This is particularly relevant for applicants who already possess over one year of prior experience in the tourism and hospitality sector in Sri Lanka.

Post-study work visa support – possibilities are explored to facilitate a two-year work visa upon completion of the Master's degree, enabling graduates to gain international industry experience.

Head of the Department of Scientometrics,
Research and Rankings

- **Research work**
- **Scientific and practical events**
- **Grants**
- **Magazines**
- **Scientific publications**
- **Ratings**

Research is carried out annually in the framework of about 50 research projects under contracts, government contracts and grants. The total amount of funding from external sources and own funds of the university in 2025 is 65.0 million rubles.

About 60 scientific and practical international and all-Russian conferences are held annually.

The journals «Manager» and «Journal of New Economy» (included in the list of leading scientific journals of the Ministry of Education and Science of the Russian Federation), the journal «Food Industry» and the scientific journal «Digital Models and Solutions» are published.

There were prepared 4431 publications in 2025.

INNOVATION YOUTH SCIENCE

«Many people think that science is boring because they imagine endless sitting over books, formulas and reports. But in reality, science is an adventure: a journey from a question and a hypothesis to discovery and new knowledge that did not exist before».

Albycheva Maria Dmitrievna

Deputy Head of the Department of Scientometry, Research and Ratings, MNS REC «TIR», Chairman of SMU USUE, Curator of SSU USUE

Research interests: regional economics, economics of single-industry cities, development of research activities, grant activities. In 2025, she defended her PhD thesis on «Single-industry municipalities in the economic space of the region: a value-localization approach.»

«A modern scientist is not only a professional in his field. He is a specialist in related fields, confidently applying new technologies and continuously developing. My colleagues and mentors are my inspiration: they are not only «scientists» in the formal sense, but also large-scale personalities united by the main thing – interest and the ability to think more broadly».

Sokolova Elizaveta Vitalievna

Leading specialist in the Department of Scientometry, Deputy Chairman of the USUE SMU, Curator of SSU USUE, graduate student

Research interests: management of scientific and technical activities, scientometrics and data analytics. A separate area of activity is the popularization of science. The dissertation research is devoted to the development of a practical system for the administration of scientometric services as a new tool in the context of the strategic development of the university's scientific potential.

«As a graduate student, I once heard a phrase from a professor at our department that changed a lot for me: «There are topics for scientific research everywhere – you just need to see them and start working.» These words helped me to direct my efforts in the right direction and to form an idea of research activity as an occupation for inventive and purposeful people».

Brashko Ivan Sergeevich

Senior Lecturer at the USUE Department of Biotechnology and Engineering, Secretary of the USUE SMU, Curator of SSU USUE

Research interests: In his dissertation, he presented an improved technology for the use of enzyme preparations for the production of food additives. Its effectiveness in processing agricultural raw materials was evaluated

Awarding the title of Honorary Professor of USUE to the Dean of the University of Sri Jayawardenepura

USUE College

The College provides education for persons who have completed lower secondary education (after Grade 9) and upper secondary education (after Grade 11), and trains mid-level specialists in the fields of economics and management, service industries, information technologies, law, and land management.

A distinctive feature of vocational secondary education is its practical orientation and rapid adaptation to labour market demands, which makes it possible to focus on acquiring specific professional competencies.

In order to strengthen the workforce potential of enterprises and institutions of the Sverdlovsk Region, the College implements network-based educational programmes developed in response to employers' requests, including programmes in cooperation with:

- LLC «Hotel Development Company» (Hyatt Regency Ekaterinburg);
- State Budgetary Institution of the Sverdlovsk Region «Multifunctional Centre for the Provision of State and Municipal Services».

These are specialized educational programmes designed to train personnel for specific business tasks, aimed at addressing labour shortages and enabling students to acquire practical skills.

Institute of Continuous and Distance Learning

The Institute of Continuing and Distance Education implements educational programmes for graduates of colleges and technical schools (persons with secondary vocational education) in part-time and correspondence forms of study according to an individual curriculum within an accelerated period of study (3.5 years).

This makes it possible to combine study with professional activity, thereby contributing to the training of highly qualified specialists. Such specialists possess competitive advantages in the labour market and are capable of effectively solving the strategic and tactical tasks faced by enterprises in the context of the transformation of the national economy.

Programmes using distance learning technologies provide access to higher education at a prestigious university from anywhere in the world.

Their key advantages include the possibility of combining study with work, broad access to modern educational materials, and the opportunity to independently plan the schedule for studying academic disciplines. This approach creates favourable conditions for accelerated professional development and career growth.

Institute of Additional Education

The Institute of Additional Education of the Ural State University of Economics (USUE) is a modern educational platform for those striving for career success, business development, and strong demand in the labour market. We offer programmes that respond to the real demands of employers and contribute to the development of a qualified personnel reserve for the sustainable development of the region.

Our portfolio includes a wide range of programmes developed in accordance with current trends in economics, management, digital technologies, and law:

- Professional retraining programmes – for those wishing to change their field of activity or obtain a new qualification. Upon completion, graduates receive a state-recognized diploma entitling them to work in a new profession.
- Advanced training programmes – for specialists wishing to update their knowledge, master modern tools and technologies, and increase their value in the labour market. Upon completion, participants receive a certificate of advanced training.
- All our educational programmes are based on the principles of practical orientation:
- Classes are taught by leading USUE professors, practicing top managers, heads of enterprises, and experts in digitalization and management.
- The educational process is based on the analysis of real business situations and the implementation of advanced managerial and technological solutions.
- Individual learning pathways provide an opportunity to develop educational trajectories tailored to the specific needs of a company or to personal career goals.
- We maintain continuous interaction with employers in order to ensure that our programmes meet their expectations and requirements for specialists.

Why choose IDO USUE?

- Modern educational program: training in modern management technologies, economic knowledge and innovative methods.
- Practice-oriented programs: Our courses have been developed in collaboration with leading enterprises in the region and are aimed at solving real business problems.
- Highly qualified teachers: experienced practitioners and recognized labor market experts.
- A wide range of training areas: advanced training of business managers, development of employee competencies, corporate educational projects.

UNIVERSITY

The Department of Admission and Pre-University Training carries out systematic activities that allow high school students to build a trajectory of professional self-determination. Long-term cooperation with educational institutions, education departments, departments and municipalities of Yekaterinburg, Sverdlovsk, Kurgan, Chelyabinsk regions, Perm Territory, Khanty-Mansi Autonomous Okrug and Yamal-Nenets Autonomous Okrug, republics of Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan contributes to ensuring the continuity of secondary general, secondary vocational and higher education. The Department implements the following forms of interaction that contribute to the disclosure and development of research potential and professional skills of future applicants:

Thematic Open Days

- Presentation of admission rules
- Questions and answers hour
- Online Open Days for remote areas, Khanty-Mansi Autonomous Okrug and Yamal-Nenets Autonomous Okrug
- Excursions to USUE
- Master classes in the areas of training

Preparatory courses for the Unified State Exam and the State Final Exam

- Lectures, practical classes, consultations on general subjects
 - Tutoring groups
 - Express courses during school holidays
 - Individual lessons in individual subjects
- Preparation of high school students for the Unified State Exam and State Final Examination, graduates of technical schools, colleges – for entrance exams.

Career guidance projects for high school students during school holidays:

- «Discover the world of USUE» for the northern territories (Tyumen Region, Perm Territory, Khanty-Mansi Autonomous Okrug, Yamalo-Nenets Autonomous Okrug);
- «Afternoon Gatherings of High School Students» for the Ural Federal District;
- «Intensive for high school students» within the framework of network interaction;
- «Eurasian shift of high school students» for students of Yekaterinburg.

The concept of the projects is to get acquainted with the areas of university training through master classes, business games, trainings, discussions. Project participants are immersed in the atmosphere of student life.

*Olympiads held jointly with

- CSU: Social Studies
 - SUSU(NRU): Natural Sciences, Biotechnology, History, Social Studies, Russian Language
 - Plekhanov Russian University of Economics: Russian Language, Economics, Foreign Language, Entrepreneurship and Financial Literacy

The winner of the 2013 Summer Universiade (skeet shooting)

The women's national volleyball team is the winner of the International University Sports Festival in 2023, a 3-time winner and a two-time silver medalist of the finals of the summer All-Russian Universiades, and since 2010 it has been the undisputed champion among universities in the Sverdlovsk region.

The men's volleyball team: the three-time winner of the Sverdlovskaya Oblast Universiades (2012-2015); the two-time winner of the Urals Federal District championships, a participant of the 2014 All-Russian Universiade Finals (10th place).

The USUE women's basketball team is a 5-time winner of the Sverdlovsk Region Universiade, consisting of two students who won the Russian 3x3 Basketball Cup and participated in the ASB All-Star Game.

The speed-skating team: the silver winner – the 2014 and 2015 Sverdlovskaya Oblast Universiades.

The athletic tourism team: the 2012 Sverdlovskaya Oblast champion.

The draughts team: the three-time bronze winners – the 2012, 2013, 2014 and 2015 Sverdlovskaya Oblast Universiades.

The USUE men's and women's table tennis teams have been winners or prize-winners of the Universiade of the Sverdlovsk Region for 8 years.

The power all-around team won 1 gold and 3 silver in 4 competitions of the Universiade of the Sverdlovsk region in the following sports: armsport, powerlifting and tug of war.

The national climbing team is the bronze medalist of the All-Russian and regional student competitions.

The badminton team is a multiple silver and bronze medalist at the Universiade of the Sverdlovsk region.

USUE has a special attitude towards creating conditions for sambo and chess classes: many events are held not only for students, but also for schoolchildren. The largest competitions held annually in these sports are the All-Russian rapid chess tournament «Ural Queen» named after A. E. Karpov and the All-Russian Student SAMBO competitions in memory of the Honored Coach of the USSR, Professor E.M. Chumakov – the qualifying stage for the Ural Federal District.
