GRADING

The assessment is cumulative and combines formative and summative assessment of the student.

The rating indicator for each module is expressed as a percentage, which shows the student's level of preparation.

Formative assessment. A 100-point grading system is used. The student's work during the semester is assessed by the teacher in accordance with the system of learning outcomes assessment.

The module programs specify the types of formative assessment, the expected learning outcomes and criteria for evaluating academic achievements.

During the semester, the teacher uses at least 3 assessments to evaluate the student's activity. If class attendance is included in the rating, then this indicator is no more than 20% of the maximum number of points in this module.

Summative assessment. A 5-point grading system is used. The student's work at the end of the module (part of the module) is evaluated by the teacher in accordance with the system developed for evaluating the student's learning outcomes in the process of studying in this discipline. Summative assessment is also carried out once competencies are acquired.

The procedure for transferring the rating to a five-point system.

High level - 100% - 70% - excellent, good.

The average level is 69% - 50% - satisfactory.

Assessment indicator	5-point grading system	Indicator characteristics
100% - 85%	excellent	Have full theoretical knowledge, understand, independently know how to apply, investigate, identify, analyze, systematize, categorize, calculate indicators, classify, develop models, algorithmize, manage, organize, plan research processes, evaluate results at a high level
84% - 70%	good	Have full theoretical knowledge, understand, independently know how to apply, investigate, identify, analyze, systematize, categorize, calculate indicators, classify, develop models, algorithmize, manage, organize, plan research processes, evaluate results. There may be shortcomings corrected by the student independently in the process of work (answer, etc.)
69% - 50%	satisfactory	Have general theoretical knowledge, are able to apply, investigate, identify, analyze, systematize, categorize, calculate indicators, classify, develop models, algorithmize, manage, organize, plan research processes, evaluate results at an average level. Mistakes are made that the student finds it difficult to correct on their own.
49 % and less	unsatisfactory	Have an incomplete amount of general theoretical knowledge, do not know how to independently apply, investigate, identify, analyze, systematize, categorize, calculate indicators, classify, develop models, algorithmize, manage, organize, plan research processes, evaluate results. Skills and abilities to solve professional tasks have not been acquired.
100% - 50%	pass	The indicator characteristic corresponds to "excellent", "good", "satisfactory"
49 % and less	fail	The indicator characteristic corresponds to "unsatisfactory"
